

Product Characteristics:

- ISO standard (4401-03-02-0-94) mounting
- Wet tubes
- Quiet surgeless operation
- Manual override
- Dual frequency 50/60Hz with DIN connector
- Moisture proof construction
- Metallic encased coil for enhanced heat dissipation
- H class coil insulation
- LED indication

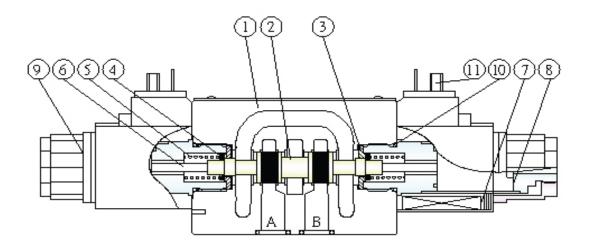

Functional Description:

The directional control valves consist of housing (1), a control spool (2), with two centering springs (5), and cylindrical operating solenoid (8).

The three-position directional control valves are fitted with two solenoids and two springs. Two-position directional control valves have either one solenoid and one return spring or two solenoids and a detent assembly.

The connectors can be turned by 90°, by loosening the nut (9); the solenoids can be turned or replaced without interfering with any seals of the valve. In the case of solenoid malfunction or power failure, the spool of the valve can be shifted by manual override, provided the pressure in T-port does not exceed 25 bar, the valve housing (1) is phosphate coated.
